TRUCK PRICES

THE much advertised statement that it is time war prices were reduced is indisputably sound. But not as sound as HAVING NO WAR PRICES TO REDUCE.

That is The White Company's position.

During five years of the steepest price ascent in the history of American business, White Truck prices have advanced, averaging all models, 16.9 per cent—an advance held to a minimum by a close margin of profit and a rapidly growing output.

Other trucks have gone up in price 30, 40, 50, 60, 70 per cent and more.

Whatever the market conditions, truck buyers can confidently purchase White equipment, knowing that the investment—past, present and future—will be protected against undue price fluctuation. Price STABILITY, the company believes, is an important index of real worth, both in an organization and in its product.
